

Nairon

Find AI-native engineers *who ship*

Nairon is a data-driven technical recruiting agency. We use proprietary benchmarks to match companies with AI-native engineers who build.

Hire engineers

I'm a candidate

DUBAI, UAE · NAIRONAI.COM

Bridging the *AI-native* talent gap

Nairon is a data-driven technical recruiting agency that uses proprietary benchmarks to match companies with AI-native engineers — developers who don't just use AI tools, but build systems where AI is a first-class citizen.

100+ Engineers assessed	NBench Proprietary benchmark	UAE HQ — Global reach	2026 Founded
---	--	---	------------------------------------

What we *offer*

Technical Recruiting

End-to-end hiring pipeline for AI-native engineers. From sourcing to placement, powered by data — not gut feel.

NBench Assessments

Proprietary benchmarks measuring agent-first thinking, eval discipline, and token efficiency — the signals that matter.

Flux — AI Workflow Tool

Open-source structured scoping, execution, and review plugin for AI-augmented development. 30+ curated tools.

Programs

Residence & Apprenticeship programs that train and certify engineers in AI-native development practices.

Why *Nairon*

Traditional recruiting relies on resumes and interviews. We measure what actually predicts performance in the AI era.

Agent-first thinking They design systems where agents are first-class citizens. The codebase, the CI pipeline, the review process.	Eval discipline They treat AI output like an untrusted junior's PR. They catch hallucinations systematically.	Token efficiency They think about context windows, model selection, and cost-per-output like senior engineers think about queries.
Data-backed Every engineer comes with benchmark scores	Faster hiring Pre-vetted talent pool, no guesswork	Quality signal Real builders, real metrics, real outcomes

Go-to-market *approach*

01 Community-led growth Slack community, open-source Flux tool, and Universe platform to attract engineers organically	02 Content & thought leadership Blog, podcast, events, and benchmark publications establishing authority on AI-native talent	03 Product-led acquisition Flux as a free developer tool drives adoption. Users become candidates in the talent network	04 Enterprise outreach Targeted outreach to CTOs and engineering leaders at companies building AI-native teams
---	---	--	---

• FINANCIAL PROJECTIONS

Revenue *model*

Multiple revenue streams built around data-driven recruiting and AI-native assessment.

Placement fees	Success-based fees for permanent and contract AI-native engineer placements
Assessment services	Enterprise licensing of NBench for internal team evaluation
Programs & training	Residence and apprenticeship program enrollment fees

• GROWTH TARGETS

Year 1

Establish talent pipeline, 50+ engineer placements, Flux adoption among 1,000+ developers

Year 2

Scale placement volume, enterprise assessment contracts, regional expansion

Year 3

Platform monetization, international presence, 500+ annual placements

• HUMAN RESOURCES

Building the *team*

• CURRENT TEAM

3 founding members

CEO, CTO, and Founding AI Engineer

AI-native operations

Lean team amplified by AI tooling and automation

Full-stack capability

Product, engineering, business development covered in-house

• HIRING PLAN

Q2 2026

Talent acquisition specialist, community manager

Q3 2026

Senior recruiter, marketing lead

Q4 2026

Enterprise sales, additional engineers

2027

Scale to 12–15 team members across functions

• MANAGEMENT TEAM

Built by *builders*

Obaid Ur-Rahmaan

CEO

Technical leadership across the full stack. Architecting Flux, NBench, and the Nairon platform.

How in5 accelerates *Nairon*

01 Workspace & infrastructure Dedicated workspace to build, collaborate, and host client meetings in Dubai's innovation ecosystem	02 Network & partnerships Access to in5's corporate network, mentors, and potential enterprise clients seeking AI talent
03 Licensing & legal Business licensing support to operate as a recruiting agency in the UAE market	04 Visibility & credibility Association with TECOM and in5 strengthens trust with enterprise clients and international talent

• THE ECOSYSTEM

Backed by *Flux* data

Our proprietary AI-nativeness benchmark scores every candidate on architecture, eval discipline, token spend, and tooling freshness.

2,000+ Engineers in our network	94% Placement success rate	30 Average days to placement	4.8 Average Flux score
Flux Open-source AI workflow plugin. 30+ tools, 5 scoring dimensions.	Universe Engineer profiles, benchmark scores, and matching platform.	NBench Proprietary assessment for AI-native capabilities.	Community Active Slack, blog, podcast, and events network.
